

Our highly experienced sales and application team assists our clients in taking a project from an early design concept all the way through delivery and start-up. We take the most complex projects and execute them on time and with close coordination to your job schedule. We partner with top-tier companies in their respective markets to ensure that any project we are involved in will be guaranteed by the best equipment in the industry.

### AAF | Flanders

Air Cleaning and High Filtration Products

Air Purification Technology

### ABB

Variable frequency drives designed for heating, ventilation and air conditioning applications.

Specialty air conditioners for critical electronic system facilities that have sensitive temperature and humidity needs.

Precision, and high percentage outside air equipment design, and innovative indoor HVAC product solutions.

Active chilled beams, induction diffusers, and induction unit consoles.

### DAIKIN

High-efficiency, variable refrigerant volume heat pumps and Heat Recovery Systems, air-cooled and water-cooled chillers, central station air handlers, applied rooftop units, vertical self-contained units, fan coils, unit ventilators, water source heat pumps, templifiers, and heating and cooling coils.

Commercial + Industrial Heating, Ventilating & Air-Handling Unit Manufacturer

### ICESTOR™

Thermal Energy Storage

An innovation green product designed to lower energy costs and provide superior cooling.

Air-Rotation HVAC Systems with a wide variety of options and ability to heat, cool, circulate, dehumidify air or add humidity with incredible energy efficiency.

Manufacturer of single, dual duct and fan-powered VAV boxes, fan coil units and air handling units.

Heating elements, fabricates sheet metal, builds electronic controls, and welds ASMI pressure vessels.

Custom air handling units with no through metal and knock down construction designs.

Custom Air Handlers

Custom HVAC systems

### OXYGEN 8

Indoor DOAS with VRV Integration

Classroom Units for healthy and comfortable learning environments

An array of direct-drive plenum fans with integral electronically commutated (EC) motors, offering superior energy efficiency and flexible, low-footprint application.

The combination of our unique patented one piece casing and the use of the most advanced technology make our towers some of the best available on the

Custom packaged DX and chilled water air handling units.

An array of direct-drive plenum fans with integral electronically commutated (EC) motors

Advanced Dehumidifier WebSentry ©

High Velocity Low Speed (HVLS) Fans

Packaged pumping systems, controls, and packaged central energy plants.

Ultraviolet technology for air purification and disinfection.
