

We have knowledgeable staff to assist you in identifying and obtaining the right OEM replacement part for all the lines of equipment and controls we represent. We want to make sure you get the right part as quickly as possible to get your equipment back up and running. More than just a parts warehouse, we can assist in the application and installation to make sure your downtime is minimized.

High-efficiency, variable refrigerant volume heat pumps, air-cooled and water-cooled chillers, central station air handlers, applied rooftop units, vertical self-contained units, fan coils, unit ventilators, water source heat pumps, templifiers, heating and cooling coils, and heat recovery systems

High efficiency, variable refrigerant volume heat pumps, air-cooled and water-cooled chillers, central station air handlers, applied rooftop units, vertical self-contained units, fan coils, unit ventilators, water source heat pumps, templifiers, heating and cooling coils, and heat recovery systems

High accuracy airflow measuring stations and transmitters

Heating elements, fabricates sheet metal, builds electronic controls and welds ASMI pressure vessels

Ultraviolet technology for air purification and disinfection

Sensors, transducers, control peripherals and web browser based IP appliances

Offering Niagara – a complete control solution for smarter, more efficient buildings

Variable frequency drives designed for heating, ventilating and air conditioning applications. ABB drives offer application specific functionality, control for different types of motors, as well as flexible connectivity to automation systems. Available with intelligent bypass and low harmonic options

Packaged and split systems 100% OA applications, hot gas reheat, liquid sub-cool coils, energy recovery systems, special coastal coatings

Honeywell environmental controls, life safety, security, sensing, scanning and mobility products, as well as building and process solutions, are at work in homes, buildings, industrial facilities, and public and private utilities around the world

Humidity, current, vacuum and pressure sensing instruments, low pressure calibrators, and weighing and counting scales for a wide variety of applications in the HVAC / R

Product offerings include relays, current sensors, power control, enclosures, power supplies, transformers and accessories

Advanced technology 100% OA units, humidity control for indoor pools and spas

Native BACnet Building Automation Systems

Provides building management solutions for heating, ventilation and air-conditioning equipment for all types and sizes of buildings. Standard open communication protocol gives building owners flexibility in their building solutions. The first to offer a top-to-bottom native BACnet system, a Windows-based operator's workstation, (DDC) technology and more

Leading supplier of energy and environmental sensors and control peripherals for Commercial HVAC and Energy Management applications

BY JOHNSON CONTROLS

Manufacturer of single, dual duct and fan-powered VAV boxes, fan coil units and air handling units

Temperature, relative humidity, pressure, current, gas and interface devices

Electric actuators for motorized control devices in heating, ventilating and air-conditioning systems

Highly accurate flow meters and energy measurement systems (BTU meters)

Developing and applying Web-based Software and Hardware Solutions for the purpose of reducing energy and operation costs while reducing dangerous levels for C emissions to our environment
