Brooks Building Solutions expert parts team is dedicated to providing you the Parts and Aftermarket solutions to fit every need you may have.

Our complete line offers quality products at competitive pricing. Allowing you to keep your equipment in optimal performance with minimal cost.

Primary Manufactures

High-efficiency, variable refrigerant volume heat pumps, air-cooled and water-cooled chillers, central station air handlers, applied rooftop units, vertical self-contained units, fan coils, unit ventilators, WSHP, tempifiers, heating and cooling coils, and heat recovery systems.

Motors designed for use in the harshest HVAC application, options with integrated internal shaft grounding systems. Motors for chillers/cooling towers, condensers and fan applications and more.

Building automation solutions for heating, ventilation and air-conditioning equipment. Standard open communications protocol gives building owners flexibility in their building solutions.

Variable frequency drives with proven reliability and design flexibility, energy efficiency, straightforward setup and configuration. Providing seamless integration with essential HVAC communication protocol with application specific functionality. Available with intelligent bypass and low harmonic options.

Building automation systems with cost-effective and scalable integration of all your control, monitoring, and operational needs with an open platform.

Field devices for energy-efficient control of heating, ventilation and air-conditioning systems. Focusing on damper actuators, control valves, sensors and meters.

Manufacturing of single, dual duct and fan-powered VAV boxes, fan coil units and air handling units.

High-engineered electric heating and thermal management technologies for commercial and industrial markets.
